Server Genius

Monitoring your servers and websites has never been so easy!

Save time and reduce unnecessary costs. Without the ability to monitor user activity in real-time, companies will continue to suffer from undetected user-based threats for extended periods of time.

With **Server Genius**, **save your company money** by monitoring applications licensed "by users" and detecting over-licensed applications or even unused software! **Server Genius** helps you to optimize your software resources and **reduce unnecessary costs**. It also helps you discovering quick-wins such as moving some users to an under-used server and planning on the long-term your IT infrastructure evolution.

Server Genius gives you **facts and data about your server's usage** (CPU, Memory, I/O, Disks), applications usage and users on Remote Desktop Services. Get reports on your website's health, availability, performances and responses.
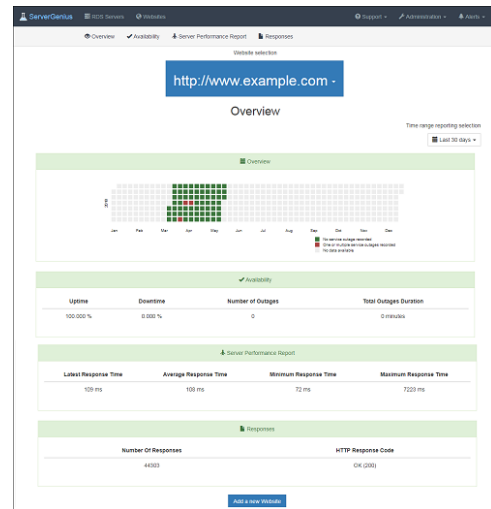

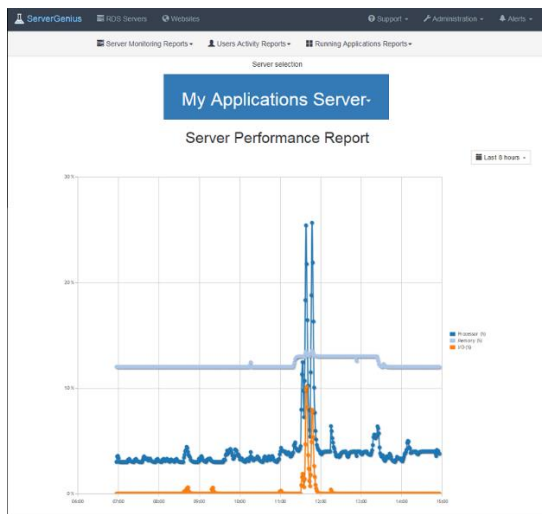

Server Genius is the easiest reporting solution to setup on. It is **easy to install, use and maintain.** Use our data collection technology to extract the most useful information about Windows RDP hosts and Remote Desktop Services infrastructure from your servers and websites, to display it in a central database.

Install it in 30 seconds on your server and get a clear understanding of its usage and performance. It just works out of the box and displays the most useful data extracted from your server and website.

Track changes, resources usage and events with real-time email alerts: don't wait for your users to complain! The Web interface allows you to get a complete overview of your server's and website activities even from your tablet or mobile phone!
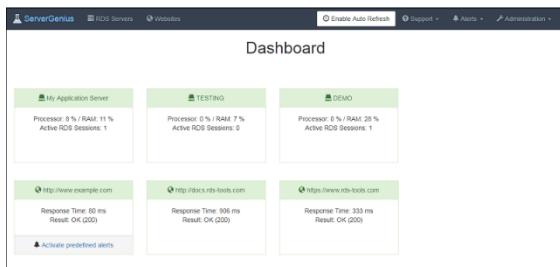

Get a clear understanding of your servers and websites' environment

*The Web interface allows you to get a complete overview of your servers and websites activities, **even remotely.** **All you need is a web browser!***

Server Genius web interface is fully compatible with tablets (iPad, Android, Surface...) and mobile phones (iPhone, Android, Windows...). With session recording**, Server Genius** records all users' activity from the moment a user logs into a Windows machine via RDP or Terminal Server.

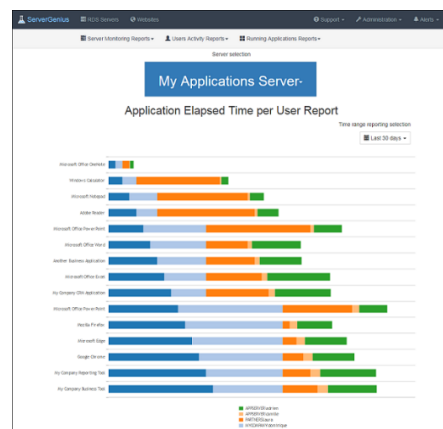

Check real-time RD Session Host performance at a GLANCE.

Get information about employees' activities when they are connected to Remote Desktop Services. Use **Server Genius** to track monthly or daily activities, identify the most active hours, and monitor user activity by day.

Reveal **important audit information about applications** and determine the most frequently used and the most appreciated applications on an RDP host server. Monitor the total time users spend using a specific app.
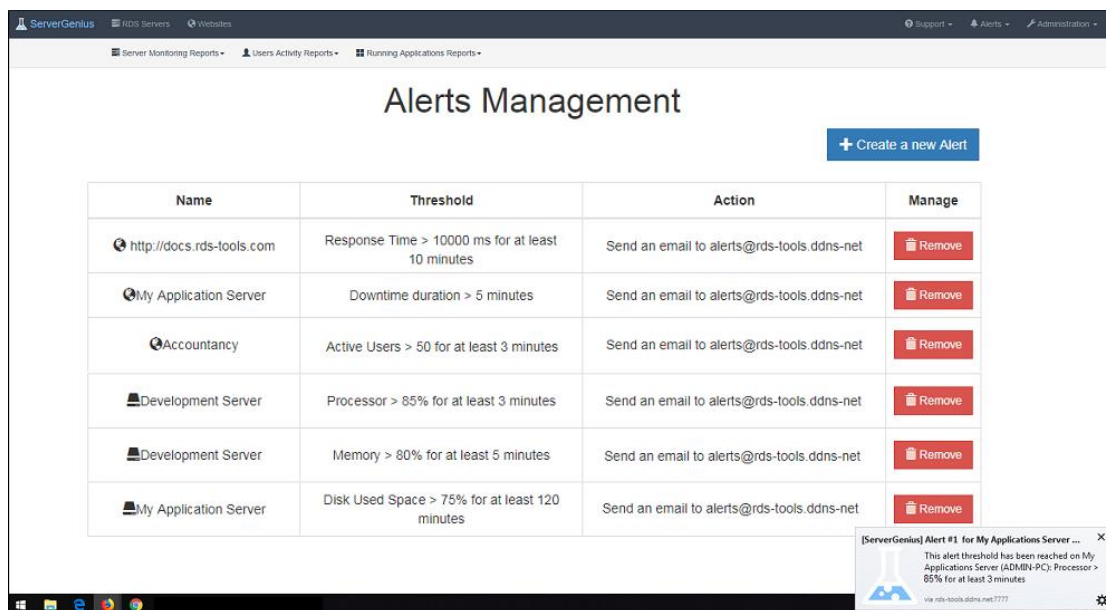

Measure bandwidth usage, gain important information for future network upgrades, and much more. Track inventory and ensure License compliance: never find yourself over- or under-licensed with license usage reports. Avoid penalties and **decrease your costs** by detecting unused licenses.

Detailed application usage tracking helps identify the most intense activity periods per application and per user.

Receive real-time alerts from anywhere in the world and troubleshoot important issues faster

Server Genius performance and applications analytics **instantly alert IT teams to abnormal or suspicious user activity on the web interface, with enabled popups or by email.** The performance and usage analytics generated by **Server Genius** allow alerts to be based on chosen events that occur during a date-range. These alerts generate emails for **an immediate awareness of the Administrator**. Access the reports **anywhere anytime** with our user-friendly web application.

➢ Customizable alerts: determine time-ranges and thresholds

➢ Web interface fully compatible with tablets and Smartphone

Editions and Pre-requisites

3 Editions are available:

⚗ **Essentials: Monitor one Server and one Website.**
⚗ **Startup Edition: Monitor 5 Servers and 5 Websites.**
⚗ **Business Edition: Monitor 10 Servers and 10 Websites**

Server Genius is compatible with the following OSs (32 and 64-bit):
➢ Windows 7, 8, 10.
➢ Windows Server 2008 / 2008 R2, 2012 / 2012 R2 / 2016 / 2019.

Server Genius is a complete solution for identifying and managing user-based risks. Track remote access to Host Server and monitor RDP sessions now!
